

Assembly instructions – OP04 powder duster

1. Unscrew the tank cap, disconnect the strainer and hose.

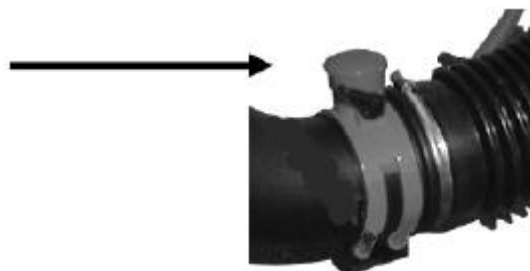

2. Dismantle the air distributor connector with the handle and the outgoing hose connector with the connection nut.

3. Install the duster adapter into the tank (please remember to install the O-ring correctly). Insert the air distributor into the tank (install with the connector).

4. Place the elbow on the adapter.

5. Remove the rubber cover from the collector.

6. Adjust the powder flow using the adjustment lever. Attach the duster hose to the collector using hose clamps.
7. Install the grounding chain.
